DETAILED ACTION

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance:

The objected **Claims 7 and 8** have been canceled and have been rewritten in independent form claims 9 and 10.

Claims 1- 6 have been amended to overcome the cited reference and the objections for lack of antecedent basis.

The prior art of the record fails to teach a wiring connection device, wherein a substantially cylindrical-shape motor case is mounted on a cylinder block of an engine; a motor stator of an electric motor having an electricity generation function is mounted in the motor case on a crankshaft of the engine is mounted a rotor mounting member; a motor rotor of the electric motor is mounted on the rotor mounting member; a terminal box having vertical walls directed in an outward radial direction is monolithic with said motor case, said vertical wall defining an aperture portion extending from an outer periphery of said motor case; a motor-side through hole, directed in the outward radial direction and which communicates inside and outside of said motor case is formed in a motor case periphery wall and enclosed by said vertical walls; a motor-side connection terminal is mounted on a motor-side coil wire drawn out from said motor stator, the motor-side connection terminal is embedded and retained by molding within said motor-side through hole; and said motor-side through hole is sealed by the molding.
